

HUMAN TRAFFICKING

This course will provide a basic overview of human trafficking (e.g., the scope, definitions and frameworks, contributing factors, different forms). The course will attempt to provide practitioners a glimpse of the lives of human trafficking victims, including physical, psychological, social, and sexual abuse that human trafficking victims experience and the types of control tactics perpetrators use. Specific interventions and responses will be covered, including mental health, social services, educational, prevention, and legal efforts.

Upon completion of this course, you will be able to learn:

- Define human trafficking.
- Identify the forms of human trafficking.
- Recognize factors associated with greater risk of being a victim of human trafficking.
- Identify indicators that contribute to human trafficking.
- Identify a victim of human trafficking in a healthcare setting.
- Explain the psychological, health, and social consequences of human trafficking.
- Interviewing strategies to assess and identify victims and promote the ethical treatment of trafficking victims.
- Describes procedures for sharing information related to human trafficking with a patient.
- Describe various educational, prevention, mental health, legal, and social services interventions and responses targeted to human trafficking victims.
- Appropriately report victims of human trafficking.
